SS代理

安装SS

1. 下载脚本

```
wget --no-check-certificate -O shadowsocks.sh
https://raw.githubusercontent.com/teddysun/shadowsocks_install/master/shadowsoc
ks.sh
```

2. 将脚本改为可执行文件

```
chmod +x shadowsocks.sh
```

3. 运行脚本文件，并输出日志

```
./shadowsocks.sh 2>&1|tee shadowsocks.log
```

切换内核，启用锐速

1. 下载脚本

```
wget --no-check-certificate -O rskernel.sh
https://raw.githubusercontent.com/uxh/shadowsocks_bash/master/rskernel.sh &&
bash rskernel.sh
```

2. 安装并开启锐速

```
yum install net-tools -y && wget --no-check-certificate -O appex.sh
https://raw.githubusercontent.com/0oVicero0/serverSpeeder_Install/master/appex.
sh && bash appex.sh install
```
